

# KS2 Science Fair

We are excited to be taking part in this year's Primary Science Fair run by Alexandra Park School and The Ogden Trust remotely. The children have all been invited to participate by creating their own science project.

The project can be an experiment to answer a question, a problem and solution or a research project. It can be on any area of science that interests your child, for example: 'How many stars can we see?', 'How does a hovercraft work?' or 'What would my family eat on the ISS if we were with Tim Peake?'.

When your child has carried out their investigation or research—they have to make a display board to communicate their learning to others. This can be made from a large cardboard box, opened out, painted or covered in wrapping paper and held together with tape. It needs to have three panels of information (as shown).

This display board should show the project title/question/problem, what your child thinks the answer is, what they did to investigate their question, what they found and a conclusion. If they want, they can include a small model or experiment and/or project notes.

All projects need to be in school by **Friday 26th June**.

If it is not possible to bring the project into school, please send a photo of each section to: [office@hollickwood.barnet.sch.uk](mailto:office@hollickwood.barnet.sch.uk) by the same deadline

Have fun!
